

Company Profile

We would like to introduce ourselves as Jason and Penny Scheurer of BEST Techs Contracting. We are passionate Build/Remodel General Contractors with Home Performance as our premise. We have been Contractors for over 25 years and started the Net Zero Energy Building as part of our platform back in 2006.

We were introduced to “Green Building” Standards by a friend and started to take classes to learn more about this new concept, or so we thought it was new. At the same time, we had started the process of building our own investment property, a three story 2817 sq ft home from the ground up in downtown Huntington Beach on 21st street. Armed with this new information that we had become familiar with, we had no choice but to “Build It Right” and so the journey began. We named our project “Living Green on 319” and the property became the first of its kind in all of Orange County, CA.

A Net Zero Energy, Green Point Rated (210 points) single family home that was a huge success. This property drew the attention of local officials, media, and over 10k in visitors, as well as green manufacturers and supply companies that either donated or discounted over \$250,000.00 worth of GREEN and Eco-Friendly products. The home was displayed and advertised for its uniqueness, which also helped the city of HB implement new energy efficient codes.

Since the showcase of “Living Green on 319”, the both of us have been relentless with our drive for Energy Efficiency and “Build it Right” for all of our clients. We are dedicated to helping clients that are looking for not just a General Contractor, but a Home Performance Contractor that will outperform their competition (if there is any), test, measure and prove the home’s end results are truly green!

We generally offer an energy savings guarantee, or you don’t pay, we can do this because we know we will save you money. But better than that (as great as saving money is) we save something much better, your health, the planet, knowing you are doing the right thing for the environment and many more benefits!

We are the BEST at what we do and we know it! If you are looking for an Eco-Friendly Contractor look no more... we are right here! We know there is not too many of us out there, that is why we travel and work from L.A. County to Orange County and have been known to work in areas of Santa Barbara and San Diego.

Thank you for taking the time to learn more about us, we would love to get the chance to learn more about you and your remodeling dreams!
