

LIVING GREEN

Building sustainable and energy efficient

BEST Techs Contracting built Living Green on 319, a Net Zero Energy (NZE) home, which means that this home is capable of producing just as much energy as it utilizes on a monthly and yearly basis. With solar PV panels built into the roof as the final green feature, energy creation was a veritable non-issue.

BEST Techs Contracting, and their team is ready to show you what Home Performance General Contractors can do for your home.
